### DETAILED ACTION

Receipt is acknowledged of the filing of an RCE and Information Disclosure Statement on 04/02/04.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4, 8, 9, 12 –20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dunn et al (US Patent No. 5,077,049).

Dunn et al disclose the use of a biodegradable matrix composition which may comprise various polymers such as polylactides (see col. 5, lines 7-31) and several solvents such as N-methyl-2-pyrrolidone(NMP) (col. 5, line 42). The composition is used for restoration of the periodontal pocket. At Example 5, col. 10, lines 35-48, 50% NMP is specifically recited. The discussion at col. 5, lines 32-51, which indicates that the solvent is already present when the implant is deposited. The instant claims are clearly anticipated by Dunn et al.

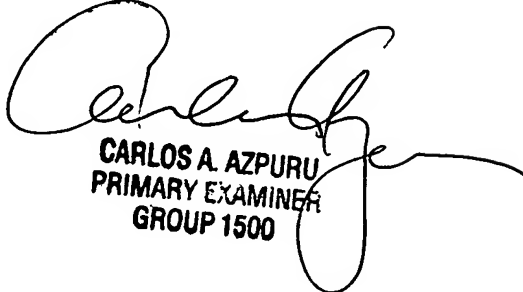

It is suggested that the claims be amended to read on a method of promoting osteogenesis, since Dunn et al clearly disclose the composition.
